Subject: CALAFCO Fire Session Report Out  
To: Colette Santsche

**I will be at my National Dog Show in Tucson, AZ and won't be available for our next LAFCo meeting.**

**Please share my thoughts with the commissioners from my attendance at this CalLAFCo U class:**

*The New Era: State of the State in terms of extreme weather, water & fire issues and what it means for LAFCos*

It was a good overview of the obvious. One part dealt with CALFire needing more partnerships with local govt. to fight the ever growing extreme fire behavior and size of the fires. The external resources to fight fire from out of state have run dry as those places are dealing with their own fires. I posed the issue that in order to have more and effective local govt resources, we in Hum and Mendo need the barrier of the HSC 138000 revised to deal with 2021. (read your letter you helped me with) (I cc'd you on the follow up email I sent CalFire regarding district formations barriers) I didn't come away with any answers to my questions. CalFire has yet to respond to my email. I did request a reply because the guy had absolutely NO IDEA. We need to pursue this issue.

Thanks,  
Debra
